

TAPWARE CARE AND MAINTENANCE

GENERAL INFORMATION

This product must be installed by a qualified plumber.

Not suitable for use with gravity-fed systems.

To ensure optimum performance and customer satisfactions please adhere to the following:

- Flush out all pipe work prior to installations

Installation should comply with relevant local authority requirements

- Maximum hot water temperature 75°C.
- Recommended minimum working pressure 150kPa.
- Recommended maximum working pressure 500kPa.

If the water pressure exceeds or is likely to exceed 500kPa, an approved pressure limiting valve must be

fitted. If the water temperature exceeds 75°C, an approved tempering valve must be fitted.

MAINTENANCE AND CARE

Chrome and matte black plated surfaces should be regularly cleaned with mild liquid detergent or soap and water.

Do not use cream cleansers, as they are abrasive or bleaches.

Do not use cleaning agents as they may damage the surface. Any damage caused in this way will not be covered by warranty.

Failure to comply with the above may void all warranties.

This warranty covers only manufacturing defects and is limited to free replacement of products of

components. (Exclude consequential losses)
